CHELTENHAM ANNUALS

THE LIST — Because we have found them to be the most satisfactory plants for continuous bloom under average conditions, our annual specialties are Petunias and Verbenas; they are available in a variety of pleasing shades which can be worked into the most subtle color scheme.

There are many attractive annuals not listed here because there is not sufficient demand for them, but if you want Arctotis, Scabiosa, or some other favored annual we can grow it for you at no extra charge (unless you order less than \$1.00 worth of one variety), provided the order is placed in February, or early March.

SIZE AND PRICE — Annuals are offered in various sizes, but we do not grow all varieties in all sizes. In general, plants offered at \$.85 per dozen are in three inch veneer bands, those at \$1.00 per dozen come from 3 inch pots, and the \$1.25 per dozen plants from 3½ inch pots. For early planting annuals from bands are usually as good in every way as those

from pots, but for late transplanting potted plants are much superior.

The seedlings offered are sown in rows in the cold frame, and are not transplanted before the time of sale when they are 2 to 6 inches tall, according to the variety.

PLANTING TIME — Hardy species, such as snapdragons, can usually be planted with safety in the latter part of April, but it is safer to wait until May for most annuals. Heliotrope and other very tender plants should not be put out until after the middle of May. However, it is advisable to place orders as soon as possible, in order to receive the best selection of plants.

TERMS — The same as those in the general catalogue, except that we do not ship annuals by mail; nor by express beyond 25 miles. *On all orders for annuals, accompanied by cash, which are received by March the first, we will allow a special 15% discount.*

Alyssum Little Gem, *Sweet Alyssum*, 6 in.
Compact edging plant, white flowers.
Seedlings \$.25 per dozen.

Antirrhinum nanum, *Snapdragon*, 18 in.
